DECIDUOUS HEDGES

There is nothing quite so effective for the boundaries of a lawn or property division as a hedge. It does not decay, nor does it require paint, but grows more beautiful and effective each year. The first cost of installing a hedge is its only cost, so that, from an economical standpoint, it is less expensive than a fence.

When a hedge is desired for screening, high-growing varieties should be used that do not require trimming; but when it is to act as a border or division, use shrubs of low, dense-growing habit.

We recommend California Privet as being the best for a compact, dense growth and dark green foliage. Where a formal effect is wanted, this can be trimmed in any manner desired—rounded or flat on top, with square sides. It is very hardy, withstanding our severe winters.

When a low hedge is wanted we recommend Thunberg's Barberry—this is one of the most attractive and ornamental hedges there is. It is much admired for its beautiful foliage, compact growth, and red berries in the fall.
